Professional Summary

Full Stack Developer with 1.5 years of hands-on experience building end-to-end web applications using Java (Spring Boot) on the backend and React/Ext JS on the frontend. Delivered production features across 2 enterprise platforms – from RESTful APIs and microservices to interactive dashboards, Gantt charts, and workflow UIs. Proficient in Redis caching, Docker, Kafka, CI/CD with Jenkins, and JPA/Hibernate ORM. Follows Agile/Scrum methodology and SOLID principles. Seeking a Full Stack Developer role to build scalable, user-facing systems across the entire stack.

Technical Skills

- **Languages:** Java, JavaScript (ES6+)
- **Backend:** Spring Boot, Spring MVC, Spring Batch, RESTful Web Services, Microservices Architecture, Hibernate, JPA, JDBC, Dependency Injection, DTO/DAO Pattern
- **Frontend:** React, Ext JS, HTML5, CSS3, Form & Workflow UI, Dashboard Development, Gantt Charts
- **Database & Cache:** MySQL, Redis, Query Optimization, Composite Indexing, Schema Design, JPA Fetch Strategies
- **Testing:** JUnit, Mockito, Unit Testing, Integration Testing
- **Tools & DevOps:** Git, GitHub, GitLab, Jenkins (CI/CD), Apache Kafka, Docker, Swagger/OpenAPI, Postman, Maven, SLF4J/Log4j
- **Concepts:** OOP, SOLID Principles, Design Patterns (Repository, Service Layer, Factory), Microservices, Agile/Scrum, DSA

Experience

Enkinlab India Pvt. Ltd, Pune

Dec 2024 – Present

Junior Software Engineer

- Built full-stack features end-to-end – designed and implemented Spring Boot backend modules for activity tracking and multi-step approval workflows, then developed corresponding React form and workflow UIs consumed by frontend clients.
- Architected and documented 15+ RESTful API endpoints via Swagger/OpenAPI, enabling seamless frontend-backend integration and reducing frontend integration queries significantly.
- Eliminated N+1 query issues using JPA fetch joins and optimized key endpoints with Redis caching, reducing average API response time from approximately 3s to under 2s (33% improvement).

Projects

Enterprise Project Management Platform *Java, Spring Boot, Spring Batch, MySQL, JPA/Hibernate, Redis, Docker, Swagger/OpenAPI, React, Ext JS, Kafka, Jenkins, JUnit*

- Developed full-stack project management features end-to-end – built Spring Boot APIs for workflows and approvals, and implemented React/Ext JS UI components including interactive Gantt charts, real-time dashboards, and time-tracking screens consumed directly by end users.
- Designed and implemented 15+ RESTful web services for project workflows, multi-step approvals, and reporting modules following microservices architecture principles.
- Engineered a nightly Spring Batch job to archive and purge records from a 1M+ row activity log table, maintaining query performance under sustained production load.
- Improved query performance by 40%+ on high-traffic endpoints using Redis caching and composite indexing strategies.

Project Management and Procurement Platform

Java, Spring Boot, MySQL, JPA/Hibernate, Docker,

Swagger/OpenAPI, Ext JS, REST APIs, Jenkins, JUnit

- Designed and built full-stack procurement and project tracking features – backend with role-based access control (RBAC) and configurable multi-step approval workflows, paired with Ext JS form and workflow UIs for end-user interaction.
- Leveraged JPA/Hibernate for ORM-based data access and raw JDBC for complex native queries; applied composite indexing on high-frequency columns, reducing average query execution time from approximately 2s to under 1.5s (25% improvement).
- Built an admin module with real-time audit log UI and user activity monitoring across 200+ daily sessions, ensuring compliance with organizational requirements.

Education

Bachelor of Technology in Computer Engineering

R C Patel Institute of Technology, Shirpur

2020 – 2024

| CGPA: 7.98/10

Certifications

Junior Software Developer Certification

March 2025

IT-ITES Sector Skill Council, National Council for Vocational Education and Training (NCVT)

Score: 93.33% | Issued by: Vinsys IT Services, Pune
